

Additional USGS Water Science Resources

Visit <https://water.usgs.gov/education.html> for more information.

Water Education Posters - <https://water.usgs.gov/outreach/>

Cartoon posters for grades K-12 on the subjects of wetlands, water use, wastewater, navigation, groundwater, coastal hazards, watersheds, water quality, and hazardous waste.

USGS Water Science School - <https://water.usgs.gov/edu/>

Information on many aspects of water, along with pictures, data, maps, and an interactive center where you can give opinions and test your water knowledge.

A Journey with Water - https://water.usgs.gov/H2O_ColoringBook.pdf

An informational coloring book (pdf).

Science in Your Watershed - <https://water.usgs.gov/wsc/>

Find scientific information organized on a watershed basis. Find your watershed and view information, coupled with observations and measurements made by the watershed groups. This information provides a powerful foundation for characterizing, assessing, analyzing, and maintaining the status and health of a watershed.
